SMITH METER® PD METERS

The **Smith Meter® Model SC-13 Meter** is a 2", single-case, straight-through type, rotary vane, positive displacement meter. Applications include: blending, batching, dispensing, inventory control, and custody transfer of oils, solvents, chemicals, paints, fats, and fertilizers.

FEATURES

- » **Superior Accuracy** – Since the unrestricted flow path results in minimal pressure drop across the measuring chamber, slippage through meter clearances is minimized and accuracy maximized.
- » **Low Pressure Drop** – Low velocities and streamlined flow path provides the lowest pressure drop PD meter in the industry.
- » **Positive and Accurate Registration** – High torque drive calibrator ensures accurate registration and adjustment in 0.05% increments.
- » **Long Service Life** – Low friction ball bearings, fixed cam-type timing, and rugged construction give sustained accuracy and long service life.
- » **Extended Flow Turndown** – NCWM approved for use from 3 to 150 GPM; an ideal solution for biofuel blending (see NTEP Certificate 95-054A4).

OPERATING SPECIFICATIONS

MAXIMUM FLOW RATE

	USGPM	L/min
Continuous Rating – Standard Trim	125	475
Intermittent Rating¹ – Standard Trim	150	570
Continuous/ Intermittent Rating – All Iron	100	375

1 Intermittent rating applies to service on clean, refined products where continuous operation is not required (e.g., truck loading, rail loading, and other loading or batching applications).
 2 Based on a maximum flow rate of 125 USGPM (475 L/min).

Repeatability

±0.02%

Viscosity

Standard: 400 cP (2,000 SSU) maximum.

Optional: 2,000 cP (10,000 SSU) maximum – specify “High Viscosity Meter Clearances.”

Over 2,000 cP: Specify “High Viscosity Meter Clearances” and derate maximum flow rate in direct proportion to viscosity

over 2,000 cP (e.g., at 4,000 cP, derate maximum flow rate to 50% of normal continuous rating - 63 USGPM).
